Aimtron
Europe
OEM

The company said that the order is strategically significant, noting that it marks Aimtron's entry into the European market

Aimtron Electronics, an India-based electronics system design and manufacturing company, has secured its first European box-build order from a Europe-headquartered original equipment manufacturer (OEM) with manufacturing operations in Spain, the company announced on 10 February.

The initial order, valued at about Rs 3.8 crore, is for a high-value box-build solution intended for European automotive and industrial end-markets. The company described the order as strategically significant, noting that it marks Aimtron's entry into the European market and demonstrates its capability to meet stringent regional quality, safety and compliance standards.

Aimtron said discussions with the customer and visibility on follow-on programmes indicate that revenue from the engagement could potentially scale to three to four times the current order size in FY27.

The development comes amid expectations that the proposed India–Europe Free Trade Agreement could improve trade flows, enhance the competitiveness of Indian manufacturers and support supply-chain diversification among European OEMs.

Commenting on the order, Sneha Shah, Whole-time Director at Aimtron Electronics, said that serving European automotive customers requires strong process discipline, quality governance and execution consistency. He added that the engagement reflects the company's investments in capabilities such as box-build, traceability and programme management, while providing an opportunity to scale across European end-markets.

The company said that the order follows its recent expansion in North America through the acquisition of a US-based ESDM and original design manufacturing firm, a move aimed at strengthening engineering capabilities and deepening engagement with global OEM customers.

Aimtron Electronics Limited, an India-based electronics system design and manufacturing (ESDM) company with operations in the United States,, today announced that it has secured its first European Box-Build order from a leading Europe headquartered OEM with manufacturing operations in Spain, serving global automotive and industrial customers.

The initial order, valued at approximately € 359.454,55 [amounting to ₹ 3,87,88,740.49] is for a high-value box-build solution catering to European end-markets. While the order size is modest, it is strategically significant as it marks Aimtron's entry into the European market and validates its ability to meet the stringent quality, safety, and compliance standards associated with European automotive customers.

Based on customer discussions and the visibility of follow-on programs, the company believes the revenue potential from this engagement could scale up to approximately 3x to 4x the current order size in financial year 2027. The development assumes strategic significance in the backdrop of the recently announced India-Europe Free Trade Agreement (FTA), which is expected to enhance trade flows, improve competitiveness of Indian manufacturers, and accelerate supply-chain diversification by European OEMs.

Commenting on the development, Sneha Shah, Whole-time Director, Aimtron Electronics Limited, said:

“Meeting European automotive requirements demands a high level of process discipline, quality governance, and execution consistency. Aimtron has invested steadily in building these capabilities across box-build, traceability, and program management. This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets.”

This development follows Aimtron's recent expansion in North America through the acquisition of a US-based ESDM and ODM company, which strengthened its engineering depth, mission-critical electronics capabilities, and engagement with global OEM customers. Together, these initiatives reflect Aimtron's broader strategy to scale its presence across key international markets while leveraging India as its manufacturing backbone.

Aimtron Electronics Limited, an India-based Electronics System Design and Manufacturing (ESDM) company with operations in the United States, has secured its first box-build order from a Europe-headquartered OEM with manufacturing facilities in Spain, serving global automotive and industrial customers.

The initial order, valued at approximately €359,454.55 (₹3,87,88,740.49), involves the supply of a high-value box-build solution for European end markets. While modest in size, the order is strategically important as it marks Aimtron's entry into Europe and confirms its capability to meet the demanding quality, safety, and compliance standards required by European automotive customers.

Based on ongoing customer engagements and visibility of future programs, the company expects the revenue potential from this relationship to expand to nearly three to four times the current order value in financial year 2027. The development gains further relevance in light of the recently announced India–Europe Free Trade Agreement (FTA), which is anticipated to improve trade competitiveness, strengthen manufacturing linkages, and accelerate supply-chain diversification for European OEMs.

Speaking on the development, Sneh Shah, Whole-time Director of Aimtron Electronics Limited, said,

“European automotive programs require rigorous process control, strong quality systems, and consistent execution. Aimtron has systematically invested in building these capabilities across box-build manufacturing, traceability, and program management. This order reflects our preparedness and creates a foundation for scaling programs across European markets.”

This win follows Aimtron's recent expansion in North America through the acquisition of a US-based ESDM and ODM company, enhancing its engineering capabilities, mission-critical electronics expertise, and relationships with global OEMs. Together, these initiatives highlight Aimtron's strategy to grow across key international markets while leveraging India as its primary manufacturing base.

Aimtron Electronics Limited (AEL) is a rapidly growing Electronics System Design and Manufacturing (ESDM) company headquartered in Vadodara, Gujarat. Founded in 2011, with manufacturing operations commencing in 2012, AEL began under a consignment-based model with one of the world's leading Original Design Manufacturers (ODMs). This early engagement enabled the company to build strong capabilities in high-volume manufacturing, operational discipline, and collaborative customer engagement.

[Aimtron Electronics Ltd](#) has announced its first Box-Build order in Europe, originating from a leading OEM with manufacturing in Spain, aimed at global automotive and industrial markets. The initial order, valued at approximately €359,454.55 (equivalent to Rs 3,87,88,740.49), is for a high-value box-build solution targeting European end-markets. Although the order is modest in size, it holds strategic significance for Aimtron, marking its entry into the European market. This also demonstrates its capability to adhere to the rigorous quality, safety, and compliance standards required by European automotive customers.

Potential scale-up by FY27

Discussions with the customer suggest potential revenue growth, projecting that this engagement could increase to approximately 3 to 4 times the current order size by the financial year 2027. This development is further underscored by the recent India–Europe Free Trade Agreement (FTA), which is anticipated to enhance trade flows, boost competitiveness for Indian manufacturers, and foster supply-chain diversification for European OEMs.

Strengthening process and compliance capabilities

Sneh Shah, Whole-time Director, Aimtron Electronics Ltd, said, "Meeting European automotive requirements demands a high level of process discipline, quality governance, and execution consistency. Aimtron has invested steadily in building these capabilities across box-build, traceability, and programme management. This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets."

Global expansion strategy

This development follows Aimtron's expansion in North America through the acquisition of a US-based ESDM and ODM company, enhancing its engineering capabilities and connection with global OEM customers. This aligns with Aimtron's strategy to grow in international markets, utilising India as its manufacturing foundation.

Aimtron Enters Europe with Rs 38 Mn Order

📅 11 Feb 2026
🕒 2 Min Read
👤 CW Team

Aimtron Electronics has secured its first European box-build order worth approximately Rs 38 million from a Europe-headquartered OEM with manufacturing operations in Spain, catering to global automotive and industrial customers.

Valued at around €359,454.55 (approximately Rs 3,87,88,740.49), the order marks the company's formal entry into the European market. Though modest in size, the engagement is considered strategically significant as it validates Aimtron's capability to meet stringent European automotive quality, safety and compliance standards.

The company indicated that, based on ongoing customer discussions and visibility of follow-on programmes, revenue from this engagement could scale to nearly three to four times the current order size in FY27.

The development comes amid strengthening trade ties under the recently announced India–Europe Free Trade Agreement (FTA), expected to enhance competitiveness for Indian manufacturers and accelerate supply chain diversification by European OEMs.

Commenting on the order, Sneha Shah, Whole-time Director, Aimtron Electronics Limited, stated that meeting European automotive requirements demands high levels of process discipline, quality governance and execution consistency. He added that the engagement reflects the company's readiness to scale programmes across European end-markets.

The European order follows Aimtron's recent expansion in North America through the acquisition of a US-based ESDM and ODM company, strengthening its engineering capabilities and global OEM engagement. Headquartered in Vadodara, Gujarat, Aimtron operates as an Electronics System Design and Manufacturing (ESDM) company, leveraging India as its core manufacturing base while expanding its international footprint."

Aimtron Electronics Secures Initial European Order For Box-Build Solutions

By MT Bureau February 11, 2026

Vadodara-based Electronics System Design and Manufacturing (ESDM) company Aimtron Electronics has secured its first order from a European Original Equipment Manufacturer (OEM). The contract, valued at approximately INR 38 million, involves providing box-build solutions for a client headquartered in Europe with manufacturing operations in Spain.

The order marks the company's entry into the European market, serving automotive and industrial sectors. Aimtron anticipates that revenues from this engagement could scale to four times the current size during the 2027 financial year.

The development follows the announcement of the India–Europe Free Trade Agreement (FTA), which aims to improve the competitiveness of Indian manufacturers. Aimtron intends to leverage its manufacturing operations in India and the United States to diversify supply chains for European customers.

This European foray follows the company's recent acquisition of a US-based electronics system design and manufacturing (ESDM) firm to strengthen its engineering capabilities for global OEMs.

Sneh Shah, Whole-time Director, Aimtron Electronics, said, "Meeting European automotive requirements demands a high level of process discipline, quality governance, and execution consistency. Aimtron has invested steadily in building these capabilities across box-build, traceability, and program management. This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets."

Aimtron Secures ₹38M European Contract In Box-Build Manufacturing

By Shubha Mitra

Share      

Aimtron Facility

February 11, 2026

Foraying into Europe with a ₹38 million automotive box-build order, Aimtron signals global ambitions as revenues could multiply under shifting trade and supply-chain dynamics.

Aimtron Electronics Limited has entered the European market, winning its first box-build contract from a major original equipment manufacturer (OEM). The company confirmed receipt of an initial order valued at about €359,000 (approximately ₹38 million) to supply high-value box-build assemblies to customers in the automotive and industrial sectors across Europe.

The OEM, whose name has not been disclosed, has production facilities in Spain, supplies global clients and operates to stringent regulatory and quality frameworks.

Although modest in size, Aimtron views this order as a milestone in demonstrating its ability to comply with European standards for safety, traceability, and quality control.

The company expects the partnership to grow substantially, with management indicating that revenues from the programme could increase to three or four times the current order value by the 2027 financial year, subject to the rollout of follow-on projects.

The timing of the deal is also seen as favourable, as the recently announced India–Europe Free Trade Agreement is expected to support cross-border manufacturing partnerships.

“This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets,” said Sneh Shah, Whole-time Director at Aimtron, adding that the European automotive sector requires rigorous process discipline and consistent execution.

The European entry follows Aimtron’s move into North America through the acquisition of a US-based electronics design and manufacturing business. Headquartered in Vadodara, Gujarat, Aimtron Electronics was established in 2011 and began manufacturing operations the following year.

Aimtron Secures First European Order Worth ₹3.8 Crore

Indian electronics manufacturer enters European market with box-build contract for automotive and industrial applications.

By Shristi Ohri | 12 Feb 2026 | 207 Views

Share - [f](#) [X](#) [in](#) [whatsapp](#)

Aimtron Electronics Limited has secured its first order from a European original equipment manufacturer (OEM), marking the company's entry into the European market. The box-build contract, valued at approximately €359,455 (₹3.88 crore), comes from an EU-headquartered company with manufacturing operations in Spain that serves automotive and industrial customers globally.

The Vadodara-based electronics system design and manufacturing (ESDM) company, which also operates in the United States, announced the development on Tuesday. The order involves producing high-value box-build solutions for European end-markets.

According to the company, the contract is strategically significant as it demonstrates Aimtron's ability to meet the quality, safety, and compliance standards required by European automotive customers. Based on discussions with the client and visibility into future programs, Aimtron expects revenue from this engagement could grow three to four times the current order size in the 2027 financial year.

The timing of the order aligns with the recently announced India-Europe Free Trade Agreement (FTA), which is anticipated to facilitate increased trade flows and supply-chain diversification by European OEMs seeking alternatives to existing manufacturing arrangements.

Sneh Shah, Whole-time Director at Aimtron Electronics Limited, said the company has invested in building capabilities across box-build, traceability, and program management to meet European automotive requirements. "This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets," Shah stated.

The European order follows Aimtron's recent acquisition of a US-based ESDM and original design manufacturer (ODM) company, which expanded its engineering capabilities and customer base in North America. The company views these moves as part of a broader strategy to expand internationally while maintaining India as its primary manufacturing base.

Aimtron Electronics was incorporated in 2011 and began manufacturing operations in 2012. The company initially worked under a consignment contract model with a major ODM before developing its current business structure.

The stock has given multibagger returns of 151 per cent from its 52-week low of Rs 358 per share.

Aimtron Electronics Limited, an India-based electronics system design and manufacturing (ESDM) company with operations in the United States, today announced that it has secured its first European Box-Build order from a leading Europe-headquartered OEM with manufacturing operations in Spain, serving global automotive and industrial customers. The initial order, valued at approximately EURO 359.454,55 [amounting to Rs 3,87,88,740.49 considering the current conversion rate], is for a high-value box-build solution catering to European end-markets. While the order size is modest, it is strategically significant as it marks Aimtron's entry into the European market and validates its ability to meet the stringent quality, safety, and compliance standards associated with European automotive customers.

Based on customer discussions and the visibility of follow-on programs, the company believes the revenue potential from this engagement could scale up to approximately three to four times the current order size in the financial year 2027. The development assumes strategic significance in the backdrop of the recently announced India–Europe Free Trade Agreement (FTA), which is expected to enhance trade flows, improve competitiveness of Indian manufacturers, and accelerate supply-chain diversification by European OEMs.

About the Company

Aimtron Electronics Ltd stands as a prominent leader in India's electronics design and manufacturing landscape, offering comprehensive end-to-end solutions that range from initial concept prototyping to full-scale mass production. Specialising in Original Design Manufacturing (ODM), IoT solutions, and **Defence** electronics, the company provides a versatile product portfolio featuring high-performance printed circuit boards (PCBs) and complex electronic assemblies. By leveraging expertise in quick-turn prototyping and bespoke engineering, Aimtron serves a global clientele across critical sectors—including medical, military, automotive, and alternative energy—consistently delivering superior performance optimisation and innovative industrial systems.

The company has a market cap of Rs 1,700 crore. The shares of the company have an ROE of 25 per cent and an ROCE of 29 per cent. The stock has given **multibagger** returns of 151 per cent from its **52-week low** of Rs 358 per share.

स्टॉक ने अपने 52-सप्ताह के निचले स्तर Rs 358 प्रति शेयर से 151 प्रतिशत का मल्टीबैगर रिटर्न दिया है।

एमट्रॉन इलेक्ट्रॉनिक्स लिमिटेड, एक भारत-आधारित इलेक्ट्रॉनिक्स सिस्टम डिज़ाइन और मैनुफैक्चरिंग (ESDM) कंपनी है जो संयुक्त राज्य अमेरिका में संचालित होती है, आज घोषणा की कि उसने एक प्रमुख यूरोप मुख्यालय वाले OEM से अपनी पहली यूरोपीय बॉक्स-बिल्ड ऑर्डर प्राप्त की है, जिसका निर्माण संचालन स्पेन में है, जो वैश्विक ऑटोमोटिव और औद्योगिक ग्राहकों को सेवा प्रदान करता है। प्रारंभिक ऑर्डर, जिसकी मूल्य लगभग यूरो 359.454,55 [वर्तमान विनिमय दर के अनुसार रु 3,87,88,740.49 के बराबर], एक उच्च-मूल्य बॉक्स-बिल्ड समाधान के लिए है जो यूरोपीय अंतिम बाजारों की सेवा करता है। जबकि ऑर्डर का आकार मामूली है, यह रणनीतिक रूप से महत्वपूर्ण है क्योंकि यह एमट्रॉन की यूरोपीय बाजार में प्रविष्टि को चिह्नित करता है और यूरोपीय ऑटोमोटिव ग्राहकों के साथ जुड़े कड़े गुणवत्ता, सुरक्षा और अनुपालन मानकों को पूरा करने की इसकी क्षमता को प्रमाणित करता है।

ग्राहक चर्चाओं और फॉलो-ऑन कार्यक्रमों की दृश्यता के आधार पर, कंपनी का मानना है कि इस सगाई से राजस्व की संभावना वित्तीय वर्ष 2027 में वर्तमान ऑर्डर आकार से लगभग तीन से चार गुना तक बढ़ सकती है। यह विकास हाल ही में घोषित भारत-यूरोप मुक्त व्यापार समझौते (FTA) की पृष्ठभूमि में रणनीतिक महत्व रखता है, जो व्यापार प्रवाह को बढ़ाने, भारतीय निर्माताओं की प्रतिस्पर्धात्मकता में सुधार करने और यूरोपीय OEMs द्वारा सप्लाई-चेन विविधीकरण को तेज करने की उम्मीद है।

कंपनी के बारे में

Aimtron Electronics Ltd भारत के इलेक्ट्रॉनिक्स डिज़ाइन और निर्माण क्षेत्र में एक प्रमुख नेता के रूप में खड़ा है, जो प्रारंभिक कॉन्सेप्ट प्रोटोटाइपिंग से लेकर पूर्ण पैमाने पर बड़े पैमाने पर उत्पादन तक व्यापक एंड-टू-एंड समाधान प्रदान करता है। मूल डिज़ाइन निर्माण (ODM), IoT समाधान और **रक्षा** इलेक्ट्रॉनिक्स में विशेषज्ञता रखने वाली कंपनी उच्च-प्रदर्शन प्रिंटेड सर्किट बोर्ड (PCBs) और जटिल इलेक्ट्रॉनिक असेंबली की विशेषता वाले एक बहुमुखी उत्पाद पोर्टफोलियो प्रदान करती है। त्वरित-टर्न प्रोटोटाइपिंग और विशेष इंजीनियरिंग में विशेषज्ञता का लाभ उठाकर, Aimtron चिकित्सा, सैन्य, ऑटोमोटिव और वैकल्पिक ऊर्जा सहित महत्वपूर्ण क्षेत्रों में एक वैश्विक ग्राहक सेवा करता है, लगातार उच्च प्रदर्शन अनुकूलन और अभिनव औद्योगिक प्रणालियों को प्रदान करता है।

कंपनी का बाजार पूंजीकरण 1,700 करोड़ रुपये है। कंपनी के शेयरों का ROE 25 प्रतिशत और ROCE 29 प्रतिशत है। इस स्टॉक ने अपने **52-सप्ताह के निचले** स्तर 358 रुपये प्रति शेयर से 151 प्रतिशत का **मल्टीबैगर** रिटर्न दिया है।

Aimtron Electronics Ltd., an Indian **electronics system design and manufacturing (ESDM)** company, has secured its **first European order** from a major OEM headquartered in the **European Union**, valued at approximately **€359,455 (₹3.88 crore)**. The contract involves production of high-value **box-build solutions** for [automotive](#) and industrial applications a strategic milestone demonstrating Aimtron's ability to meet **European quality, safety, and compliance standards** required by leading automotive customers.

Strategic Global Expansion into Europe

The European order marks Aimtron's **formal entry into the EU market** through a box-build manufacturing engagement with a Spain-based OEM that serves global customers. While the initial order size is modest, the company highlighted that based on ongoing engagements and visibility of future programs, the **revenue potential could grow three to four times** the current order value in the **2027 financial year** signalling strong follow-on opportunities.

Trade Dynamics and Operational Capabilities

The timing of the European order coincides with broader international trade developments, including the **India-Europe Free Trade Agreement (FTA)**, which is anticipated to foster increased trade flows and supply-chain diversification by European OEMs seeking alternatives beyond traditional manufacturing bases. Aimtron has strategically invested in capabilities across box-build, traceability, and program management to comply with European automotive requirements and scale its programs across end markets.

Aimtron's global strategy follows recent moves to expand engineering capability and customer base, including acquisitions and growth in the U.S. market, while keeping India as its primary manufacturing hub.

Aimtron Electronics secures strategic ₹3.87 crore European order

short by / 11:57 am on Friday, 13 February 2026

Aimtron Electronics Limited secured its first European Box-Build order valued at ₹3,87,88,740.49 from a leading Spain-based OEM. Serving global automotive and industrial customers, this strategic entry validates meeting stringent quality standards. Revenue potential could scale up to 400% in financial year 2027, supported by the India–Europe Free Trade Agreement and supply-chain diversification.

Aimtron Enters Europe with INR 3.8Cr Order

Vadodara, India – Aimtron Electronics Ltd, an India-based electronics system design and manufacturing (ESDM) company with operations in the United States, announced that it has secured its first European Box-Build order from a leading Europe headquartered OEM with manufacturing operations in Spain, serving global automotive and industrial customers.

The initial order, valued at approximately € 359.454,55 [amounting to INR 3,87,88,740.49] is for a high-value box-build solution catering to European end-markets. While the order size is modest, it is strategically significant as it marks Aimtron's entry into the European market and validates its ability to meet the stringent quality, safety, and compliance standards associated with European automotive customers.

Based on customer discussions and the visibility of follow-on programs, the company believes the revenue potential from this engagement could scale up to approximately 3x to 4x the current order size in financial year 2027. The development assumes strategic significance in the backdrop of the recently announced India-Europe Free Trade Agreement (FTA), which is expected to enhance trade flows, improve the competitiveness of Indian manufacturers, and accelerate supply-chain diversification by European OEMs.

Commenting on the development, Sneha Shah, Whole-time Director, Aimtron Electronics Ltd, said, "Meeting European automotive requirements demands a high level of process discipline, quality governance, and execution consistency. Aimtron has invested steadily in building these capabilities across box-build, traceability, and program management. This engagement reflects that readiness and provides a clear pathway to scale programs across European end-markets."

This development follows Aimtron's recent expansion in North America through the acquisition of a US-based ESDM and ODM company, which strengthened its engineering depth, mission-critical electronics capabilities, and engagement with global OEM customers. Together, these initiatives reflect Aimtron's broader strategy to scale its presence across key international markets while leveraging India as its manufacturing backbone.

AIMTRON SECURES FIRST EUROPEAN BOX-BUILD ORDER

Aimtron Electronics Limited wins its first European box-build order, marking entry into the European automotive and industrial markets.

Aimtron Electronics Limited, an India-based electronics system design and manufacturing (ESDM) company with operations in the United States, has secured its first European box-build order from a leading Europe-headquartered OEM with manufacturing operations in Spain, serving global automotive and industrial customers.

The initial order, valued at approximately € 359.454,55 [amounting to Rs 3,87,88,740.49], is for a high-value box-build solution catering to European end-markets. While the order size is modest, it is strategically significant as it marks Aimtron's entry into the European market and validates its ability to meet the stringent quality, safety and compliance standards associated with European automotive customers.

Based on customer discussions and visibility of follow-on programmes, the company believes the revenue potential from this engagement could scale up to approximately 3x to 4x the current order size in financial year 2027. The development assumes strategic significance in the backdrop of the recently announced India-Europe Free Trade Agreement (FTA), which is expected to enhance trade flows, improve the competitiveness of Indian manufacturers and accelerate supply-chain diversification by European OEMs.

Commenting on the development, **Sneh Shah, Whole-time Director, Aimtron Electronics Limited**, said, "Meeting European automotive requirements demands a high level of process discipline, quality governance, and execution consistency. Aimtron has invested steadily in building these capabilities across box-build, traceability, and programme management. This engagement reflects that readiness and provides a clear pathway to scale programmes across European end-markets."

This development follows Aimtron's recent expansion in North America through the acquisition of a US-based ESDM and ODM company, which strengthened its engineering depth, mission-critical electronics capabilities and engagement with global OEM customers. Together, these initiatives reflect Aimtron's broader strategy to scale its presence across key international markets while leveraging India as its manufacturing backbone.
