Aimtron Enters European Market with Strategic Box-Build Order from Leading European OEM

Vadodara, India, 10th Feb, 2026 – Aimtron Electronics Limited, an India-based electronics system design and manufacturing (ESDM) company with operations in the United States,, today announced that it has secured its first European Box-Build order from a leading Europe-headquartered OEM with manufacturing operations in Spain, serving global automotive and industrial customers.

The initial order, valued at approximately **€ 359.454,55** [amounting to **₹ 3,87,88,740.49** considering current conversion rate] is for a high-value box-build solution catering to European end-markets. While the order size is modest, it is strategically significant as it marks Aimtron's entry into the European market and validates its ability to meet the stringent quality, safety, and compliance standards associated with European automotive customers.

Based on customer discussions and the visibility of follow-on programs, the company believes the revenue potential from this engagement could scale up to approximately three to four times the current order size in financial year 2027.

The development assumes strategic significance in the backdrop of the recently announced India–Europe Free Trade Agreement (FTA), which is expected to enhance trade flows, improve competitiveness of Indian manufacturers, and accelerate supply-chain diversification by European OEMs.

About Aimtron Electronics Aimtron Electronics Limited (AEL) is a fast-growing Electronics System Design and Manufacturing (ESDM) company headquartered in Vadodara, Gujarat. Incorporated in 2011 and commencing manufacturing in 2012, AEL initially operated under a consignment contract model with one of the largest Original Design Manufacturers (ODMs), gaining deep expertise in volume production, operational discipline, and customer collaboration.
